Shaping the future of press technology

Engineered for you

Viega pioneered press technology in North America in 1999 with Viega ProPress. Now, nearly 20 years later, Viega press technology makes consistent, secure connections possible on copper, stainless, carbon steel, copper nickel and PEX. No other manufacturer can offer the same press technology across multiple pipe joining materials. Viega press systems also offer proven security through innovations like patented Viega Smart Connect technology, which is only available on genuine Viega press fittings. Installers can trust a Viega connection and finish a job without worrying because Viega Smart Connect technology helps easily identify unpressed connections during pressure testing.

Integrated system solutions

Viega offers products including copper, stainless steel, carbon steel and copper nickel press fittings along with a complete PEX plumbing system including water distribution manifolds, tubing and press fittings. Our primary press solutions for metals are Viega ProPress and Viega MegaPress. Manufactured with different sealing elements, we offer fittings for both plumbing and mechanical applications. The Viega PureFlow System is a complete plumbing systems that work seamlessly for potable water installations. Many Viega fittings are equipped with Viega Smart Connect technology, helping to easily identify unpressed connections. System-matched tools and jaws make it simple and easy to install the full line of Viega press technology for several applications on the same project.

Energy-efficient heating and cooling

Radiant heating and cooling systems have been around since 10,000 B.C., but Viega has made them more efficient, reliable and easier to install than ever. With options suitable for any application, Viega radiant panels and Climate Mats are perfect for new or remodel construction.

Insulated Pipe

viega

Insulated Pipe

Viega's Insulated PEX Barrier Piping system is for use in snowmelt applications where distribution is necessary. The flexible pipe is produced with LDPE jacket, polyurethane foam insulation, and PEX carrier pipe. The bonded insulation provides long-term R-value retention, and the plastic piping characteristics eliminate thermal expansion considerations. It's easy to plan and quote projects with Viega's exceptional freight and delivery times. Discover how Viega's snow-melting repertoire will benefit your next project.

FEATURES AND BENEFITS

- Superior insulation results in a reduction in heat loss
- High compressive strength
- No risk of water penetration
- Flexibility reduces the number of fittings required
- No special considerations for thermal expansion
- Freon free, high performance, closed cell polyurethane insulation
- Smooth LDPE jacket resists impacts and is UV treated
- "Smart" membrane maintains insulation value over time, keeping operational performance high
- Carrier pipe features EVOH oxygen barrier
- Fitting insulation kits provide equivalent insulation value to that of the pipe itself
- Available in custom-length coils
- No special tools required to assemble fittings

Viega

Terms and Conditions

The following standard Terms and Conditions apply to all sales of products by Viega LLC unless otherwise modified in Order Confirmation or Delivery Note. Any contrary terms in purchase orders or purchaser standard terms and conditions are rejected and acceptance of the order by Viega LLC is conditioned upon these terms and conditions or as set out specifically in the Viega order confirmation.

Terms of Payment: Terms are net 30 days. Payable in U.S. or Canadian dollars depending on point of delivery.

Price Changes: All published prices are subject to change. Viega historically has given reasonable notice (normally 30 days or more) of an effective date for those changes, but reserves the right, under unusual circumstances, to give shorter notice.

Sales Orders: Purchase orders submitted to Viega shall specify Viega part numbers as well as product description from a Viega catalog. All such offers to purchase are subject to Viega LLC acceptance, which shall be by order confirmation provided to the customer by Viega. Customer is responsible for reviewing the order confirmation and reporting any necessary changes to Viega Customer Service immediately. Mistakes on orders due to inaccurate or incomplete information from the customer and not changed by the customer will be the customer's responsibility and/or subject to Viega's return policy.

Terms of Shipment: Freight is paid by Viega LLC on orders \$2,500 net or greater (excluding stainless steel pipe orders). On orders that are less than \$2,500 net, freight is prepaid and added to the invoice. Excess freight charges resulting from special requested routing or specifying non-Viega LLC

designated common carriers will be billed to the customer.

Stainless steel pipe qualifies for prepaid freight at \$5,000 net and cannot be combined with other products to make freight.

Stainless steel fittings may be combined with other Viega LLC products and qualify for prepaid freight at \$2,500 net.
